	Measuring Machine CMM Qi			
10	**EROWA CMM Qi**	1 PC		

Version
Top precision 3D CNC measuring machine. Central drive design for superior accuracy. Prepared for various EROWA tooling systems.

Measuring
Quality measuring with protocol from CAD imported data. The motorized drives support serial work.

Scope of delivery
Automatic temperature compensation, hole pattern on the table for EROWA tooling systems, air conditioning unit, calibration sphere ø 25 mm, measuring software Metrolog X^4

Technical Data
Range, X-axis: 600 mm
Range, Y-axis: 700 mm
Range, Z-axis: 500 mm
Maximum distance between table and probe holder (without probe): 668 mm
Maximum distance between the portal: 650 mm
Measuring accuracy: 1.5 µm +L/500 (L in mm)
Environmental conditions: 19°C-21°C Delta 0.5°C / h

Software
Measuring Software: Metrolog X4

Machine dimensions
Height: 2700 mm
Footprint: 1424x2105 mm
Max. workpiece load: 650 kg
Machine weight (without load) 2350 kg

Data	
Language of manuals	German / English / French
CMM (Coordinate measuring machine)	
EROWA CMM Qi / Metrolog X4 (ER-102155) incl. Joystick ME470 incl. man. Thermal compensation incl CNC-Controller ME5009 incl. EROWA hole pattern incl. air preparation unit incl. Calibration sphere incl. Measuring software Metrolog X4 incl. Manuals / Certificate	1 PC
Packaging	
Packaging CMM Qi overseas	1 PC
Evaluation unit	
Evaluation unit (ER-007805)	1 PC
Probe heads	
PH10MQ Probe head motorized	1 PC

EROWA®
